SUBJ: FELLS POINT PRINCESS, MD7290AN
STABILITY LETTER

Dear Sir:

A simplified stability test, supervised by the U.S. Coast Guard, was performed on the vessel FELLS POINT PRINCESS on August 12, 1992 at Baltimore, MD. The test was conducted in accordance with the requirements of 46 CFR 171.030. Test results indicate that the subject vessel, as presently outfitted, has satisfactory stability for passenger service under reasonable operating conditions for the carriage of not more than 25 persons on protected waters. No changes in construction, equipment, or ballast shall be made to this vessel without prior notification to the cognizant Officer in Charge, Marine Inspection and receipt of permission from such officer.

Inasmuch as passenger capacity and route are based not solely on stability, but may be further limited by other criteria, you are cautioned that the number of persons allowed to be carried and the route permitted shall be specified in the Certificate of Inspection.

It shall be the responsibility of the operator of this vessel to maintain it in a satisfactory condition of stability at all times.

This stability letter shall be posted under glass or other acceptable transparent material near the steering station of the vessel.

Sincerely,

R. L. EDMISTON
Captain, U.S. Coast Guard
Officer in Charge
Marine Inspection
